

Respondents who own Mace<sup>®</sup> Brand pepper spray indicated they carry a variety of Mace products.

# Spice Up Your DEFENSE

**OC Pepper:** Oleoresin capsicum is a naturally occurring substance derived from hot peppers. OC Pepper causes an intense burning sensation to the skin, eyes and throat upon contact. Mace<sup>®</sup> Brand defense sprays are available in different strengths to satisfy virtually every requirement.

**As an added defense,** many of our formulations contain an ultraviolet dye. The dye will invisibly mark an assailant which may aid in identification.

**Research has shown** that bear spray is even more effective than a gun in stopping bear attacks. If you find yourself face-to-face with a bear in the wild, a canister of bear pepper spray and the knowledge of how to use it properly are your best defense.
